Education

Workintech, *Data Scientist & AI Program*
6months - 960 hours - 70 + projects - 2026

Bahcesehir University, *Bachelor Of Software Engineering*
2020 - 2025

Languages

English, *Fluent (C1 / Advanced — IELTS 7.5)*
Turkish, *Native*
German, *Beginner (A1) — Admitted to language track; preparing for intensive study upon arrival*
Spanish, *Beginner*

Certificates

Data Scientist & AI, Workintech, *ongoing*

Foundations of Project Management, Google, *11.2023*

User Experience Principles and Processes, Michigan Tech, *03.2024*

User Experience Design, Georgia Tech, *03.2024*

Omer Meraloglu
Data Scientist

Full-stack Software Engineer (2+ years) transitioning into Data Science. Experienced in Python and SQL, with foundational knowledge of AWS. Currently building ETL pipelines and LLM integrations through an intensive Data Science program. Positioned to directly apply my software background to build and maintain data architectures.

SKILLS

Python • SQL • MySQL • Pandas • NumPy • Scikit-Learn • PyTorch • Google Cloud Provider • Streamlit • FastAPI • Git • TypeScript • React • Figma • ETL • AWS

EXPERIENCE

Workintech *-Data Science Trainee* 2026- present

- Gaining hands-on experience with data analysis, engineering and automation. Working on LLM's, Data Analyst and Data Science projects every day.

SAB Tourismo LTD *- Responsible for Research and Development* 2023 - 2025

- Worked closely with the CEO of this medical tourism tech company to create creative and modern business solutions.
- Took on the responsibility for developing and deploying new fullstack systems and driving the company's R&D.
- Used mainly AWS, Python, Flask, MySQL.
- Worked closely with the CTO of this medical tourism tech company to create software products that will actually solve business needs.
- Created software products that enabled customer agencies to automate and enhance the CRM lifecycle of medical tourism sales.
- Used mainly, Python, React, Next.js, and Figma.

Doğuş Teknoloji, *Fullstack Developer Internship* 2024

- Collaborated in a virtual team environment using Git and GitHub
- Learned Git version control and the basic understanding of APIs.

PROJECTS

Smart Story Seeds United Nations Project - *Website* | *Github*

- Assisted in product development and solely engineered an interactive platform honoring the Korean War's 22 United Nations Sending States by linking physical seed capsules to digital historical storytelling.
